

SHAHEER AHMED

Karachi, Pakistan | +92 304-5467944 | shaheerkhatri123@gmail.com | LinkedIn | GitHub

Professional Summary

Results-oriented **Computer Systems Engineer** specializing in **AI Agents, Automation Workflows**. Proven track record in engineering scalable Python applications, fine-tuning LLM pipelines (Gemini, OpenAI), and constructing autonomous agentic workflows. Possesses strong expertise in integrating modern AI endpoints with business operational software to automate complex administrative workflows, reduce manual operational overhead, and power data-driven decision-making.

Technical Skills & Core Competencies

AI & Agentic Frameworks: n8n, LangChain, LangGraph, OpenAI API, Gemini API.

Software Development & Scripting: Python, JavaScript, Node.js, FastAPI, HTML/CSS.

Systems Integration: API Connectivity, Automations, MySQL, PostgreSQL, NoSQL.

Machine Learning & Data Science: TensorFlow, PyTorch, Pandas, NumPy, Scikit-Learn, Predictive Analytics.

Developer Tools & Infrastructure: Git, GitHub, Docker, Linux Command Line, VS Code, Network Routing Protocols.

Professional Soft Skills: Technical Communication, Problem Solving, Cross-Functional Teamwork, Workflow Architecture.

Relevant Professional Experience

AI Engineer (Part-Time)

NeuroSmith

Jan 2025 – Jun 2025

Hyderabad, Pakistan

- Deployed multi-model AI systems combining RAG retrieval with agentic workflows to automate B2B client support and reporting tasks.
- Built real-time data pipelines connecting AI model outputs to business dashboards, replacing manual data compilation.
- Authored technical documentation and ran onboarding sessions for end-users, reducing support queries post-handoff.

Lead Developer — HandCodeAI

(Final Year Project)

Nov 2024 – Jul 2025

MUET, Jamshoro

- Designed an autonomous, multi-agent AI system with Python and Gemini APIs for handwritten code execution.
- Crafted prompt pipelines and output templates, cutting error troubleshooting time by 40%.
- Integrated sandboxed runtimes with real-time feedback loops for dynamic error recovery.
- Managed end-to-end SDLC from system architecture to deployment and testing.

Risk Data Analyst Intern — RadixTech

RadixTech

Jun 2024 – Aug 2024

Hyderabad, Pakistan

- Engineered ML regression models to predict risk metrics, boosting forecast accuracy by 15%.
- Connected model outputs to executive dashboards and automated reporting workflows.
- Built automated ETL pipelines to clean, preprocess, and structure enterprise data.

Data Science Fellow (Artificial Intelligence) — Bytewise

Remote Fellowship

Pakistan

- Optimized data pipelines and performed EDA on large datasets to improve model training efficiency.
- Implemented machine learning algorithms and created visualizations to extract actionable insights.

AI Automation & Systems Integration Projects

Hospital RAG Chatbot n8n, RAG

- Built a RAG-enabled hospital chatbot in n8n, including a full ingestion pipeline to process and index hospital-related documents.
- Designed a retrieval pipeline to fetch relevant context and generate accurate, grounded responses to user queries.

AI Review & Refactoring System (CodePilot) Python, React, Gemini API

- Built a tool that automatically reviews code every time it is updated, without needing manual checks.
- Designed the system to automatically catch security issues, bugs, and performance problems in the code.
- Enabled the tool to suggest and generate improved, ready-to-use code automatically.

Research Paper Summarizer & Insight Visualizer ReactJS, FastAPI, Gemini API

- Built a full-stack web application with a FastAPI backend and React frontend that accepts a research paper title as input.
- Leveraged the Gemini API to autonomously fetch relevant paper content from the web and generate a concise, structured summary.
- Designed a clean, presentation-ready React interface to visually showcase key findings, methodology, and outcomes extracted from the paper.

Training & Certifications

NAVTC — Artificial Intelligence Specialist (ML & DL) Feb 2024 – May 2024
MUET, Jamshoro

- Completed intensive practical training on Neural Networks and Time Series forecasting using PyTorch and TensorFlow.
- Solved real-world industrial data problems through hands-on lab projects focused on deep learning model optimization.

Education

B.E. Computer Systems Engineering 2021 – 2025
Mehran University of Engineering and Technology (MUET), Jamshoro CGPA: 3.18 / 4.0

Extracurricular Activities

- **Member, ACM Student Chapter** — MUET, Jamshoro 2024 – 2025
Attended technical sessions and volunteered in chapter-organized events.
- **Member, PM Youth Movement** — MUET, Jamshoro 2023
Participated in sessions and volunteered in event organization and execution.

Research Publications

Enhancing Cybersecurity Threat Detection Using Machine Learning 2025
Accepted at International Multi-Topic ICT Conference (IMTIC)

- Co-authored and published research evaluating seven ML algorithms on large-scale security datasets to optimize accuracy and execution speed for automated threat detection tools.
